

ANSH PATEL

Surat, India — anshpatel40206@gmail.com — +91-8849621862 — LinkedIn — GitHub

Professional Summary

Cybersecurity student with hands-on lab experience in SOC operations, network analysis, attack simulation, and digital forensics. Skilled in network and web VAPT, SOC monitoring, and Linux/Windows Server administration, with a solid foundation in computer hardware and networking. Actively building practical skills through security labs and projects. Seeking an entry-level SOC Analyst / VAPT role.

Technical Skills

Domains: SOC Operations, Incident Response, Network & Web VAPT, Vulnerability Assessment, Attack Simulation
Security Tools: Nmap, Nessus, OpenVAS, sqlmap, Wireshark, Burp Suite, Metasploit, OWASP ZAP, Gobuster, ffuf, Splunk, SIEM

Networking: TCP/IP, DNS, HTTP/HTTPS, Firewalls, Network Troubleshooting

Systems & Servers: Windows Server, Active Directory & Domain Controller, RHEL/Linux Server, FTP Server, User & Permissions Management

Frameworks: MITRE ATT&CK, OWASP Top 10

Programming/Scripting: Python, Bash

Other: Computer Hardware, OS Installation & Configuration

Academic Projects & Labs

SecureCorp Portal – Web Application VAPT (Multi-Vulnerability Assessment)

- Conducted a structured web application penetration test on a simulated employee portal, identifying and exploiting IDOR, Improper Session Management, Broken Admin Panel Access Control, SSRF, XSS, and SQL Injection vulnerabilities.
- Used Burp Suite to intercept login traffic, uncovering hardcoded credentials and a client-trusted role cookie that enabled full privilege escalation to admin without valid credentials.
- Exploited an IDOR in the profile-viewing endpoint to access the CEO's confidential payroll and security data, and an SSRF flaw to disclose an internal secret endpoint via a crafted URL payload.
- Authored professional VAPT reports for each finding, including proof-of-concept, impact analysis, risk classification, and remediation, aligned with OWASP and CWE references.

Capstone Project – End-to-End Penetration Test & CTF

- Performed a full end-to-end penetration test against a vulnerable web portal, combining web enumeration, authentication bypass, post-exploitation, and log analysis into a single engagement.
- Used Gobuster and ffuf for directory/parameter enumeration, then intercepted and forged a JWT authentication token (exploiting missing signature verification) to escalate privileges.
- Harvested SSH credentials leaked via an exposed `phpinfo.php` page, gained shell access, and located a sensitive vault directory containing a PCAP file.
- Performed advanced Nmap service/version enumeration and NSE scripting to fingerprint exposed services during reconnaissance.
- Analyzed the recovered PCAP in Wireshark to extract a plaintext password, then used Splunk to query logs and decode a final Base64-encoded flag.

Self-Driven XSS & SQL Injection Research (Istudio – PortSwigger Labs)

- Independently practiced and documented multiple web application vulnerability classes using PortSwigger Web Security Academy labs and public test targets.
- Exploited a SQL Injection flaw in an admin login form using a comment-based payload (`' --`) to bypass authentication without valid credentials, demonstrating full admin panel takeover risk.
- Demonstrated Reflected XSS and an advanced Event Handler-based XSS technique (`onpageshow`) that bypasses standard `<script>`-tag filters and executes without user interaction.
- Authored structured vulnerability reports covering proof-of-concept, impact analysis, risk classification, and remediation, aligned with OWASP and CWE references.

Network Traffic Analysis & SIEM-Based Incident Investigation

- Investigated a simulated phishing/malware incident by analyzing a PCAP in Wireshark, reconstructing the full attack timeline from initial access through to command-and-control traffic and data exfiltration.
- Investigated a separate ARP spoofing capture, identifying the attacking MAC address and spoofed IP target to confirm a Man-in-the-Middle scenario.
- Investigated a simulated data exfiltration incident in Splunk, building SPL queries to isolate CRITICAL severity events and trace the responsible user account.
- Decoded Base64-encoded exfiltrated payloads using CyberChef to recover the incident flag and validate findings.

Education

Bachelor of Software Engineering 2023 – 2027
Sarvajanik College of Engineering and Technology (SCET)
CGPA: 8.63 / 10 (Sem 1: 8.14, Sem 2: 8.52, Sem 3: 8.43, Sem 4: 8.91, Sem 5: 8.86, Sem 6: 8.90)

Advanced Diploma in Cyber Security Jan 2025 – Jul 2026
PureSkill IT Training Academy

Higher Secondary Certificate (HSC) 2023
Smt. D. R. Rana Vidhyasankul — Stream: PCM — Percentage: 76.33%

Secondary School Certificate (SSC) May 2021
Smt. D. R. Rana Vidhyasankul — Percentage: 85.83%

Certifications

- **Cybersecurity Course** – Tutedude Jul 2026
- **Cyber Threat Management** – Cisco Networking Academy Feb 2025
- **Introduction to Cybersecurity** – Cisco Networking Academy Mar 2025
- **Computer Hardware Basics** – Cisco Networking Academy Mar 2025
- **Networking Basics** – Cisco Networking Academy Jan 2025
- **Ethical Hacking Course** – Tutedude Jun 2025

Achievements

- **Galactic Problem Solver** – NASA International Space Apps Challenge 2024 Oct 2024
- Scored **97.15 Percentile** in Gujarat State **Talent Search Test (Std-9)**, conducted by Gujarat Secondary and Higher Secondary Education Board Feb 2020
- Qualified the State-level **Secondary Education Scholarship Exam** (Madhyamik Shikshan Shishyavrutti Pariksha), Gujarat State Examination Board Dec 2019
- Secured 1st Rank in “**Stok x Stycke**” event at State-Level Tech Fest *Updates 2K25*, SCET Sep 2025
- Secured 3rd Rank in **Treasure Hunt**, Urja 2023 (Kshitij 2023), SCET Sep 2023

Volunteer Experience

- Management Team Member** – THM, SCET
- Played a key role in planning and executing technical and management events.
- College Marketing Team Member** – NASA Space Apps Challenge 2024
- Coordinated promotional activities to encourage college-wide participation.
- Core Team Member** – Updates 2K25
- Contributed as a core organizing team member for the college’s state-level technical fest.
- Team Member** – Updates 2K24
- Supported event execution and coordination as part of the organizing team.
- Volunteer (Backstage, Stage Design, Parking)** – Verve 2K25
- Managed backstage operations, assisted in stage setup and design, and coordinated parking logistics during the event.

Additional

- Regular hands-on practice via security labs, VAPT exercises, and CTF challenges.
